

**DIGITAL SOLUTIONS.
BUILT AROUND YOUR BUSINESS.**

SOFTWARE DEVELOPMENT | DIGITAL TRANSFORMATION | BUSINESS SOLUTIONS

QATAR-REGISTERED SOFTWARE COMPANY

Regional collaboration across Saudi Arabia, UAE, Jordan and Palestine

ABOUT Q NOVA

Technology that fits the way your business works.

Q Nova for Software W.L.L. is a Qatar-registered software company focused on designing, developing and delivering practical digital solutions for businesses. We translate operational requirements into reliable software - from customer-facing web and mobile applications to business platforms that improve visibility, control and efficiency.

WHAT DEFINES Q NOVA

A client-focused technology partner combining software expertise, customization and regional collaboration.

OUR MISSION

Help businesses digitize processes, improve customer experiences and operate more efficiently through dependable, scalable and business-focused software solutions.

OUR APPROACH

Understand the requirement first, then design, develop and configure the right solution with flexibility, integration readiness and room to evolve.

REGIONAL REACH

Headquartered in Qatar, with joint-venture and business cooperation agreements supporting opportunities across Saudi Arabia, UAE, Jordan and Palestine.

OUR CORE CAPABILITIES

A broad portfolio of digital and business technology solutions.

Web Application Development

Responsive, secure and scalable web applications tailored to customer, employee and operational workflows.

Mobile App Development

Business and consumer mobile applications designed around usability, performance, integrations and future growth.

eKYC Solutions

Digital onboarding and identity-verification solutions supporting streamlined customer registration and verification journeys.

CRM Solutions

Platforms for managing leads, opportunities, customer interactions, activities and service processes.

Accounting & Cloud Accounting

Solutions supporting structured financial processes, reporting and cloud-enabled access.

POS Solutions

Point-of-sale solutions for sales transactions, branch operations, reporting and connected workflows.

Inventory & Asset Management

Track stock, assets, movements, locations, assignments and operational records.

RFID Solutions

RFID-enabled identification and tracking for assets, inventory and operational use cases.

ERP Solutions

Integrated enterprise solutions connecting finance, operations, inventory, procurement and business workflows.

HR Solutions

Human resources solutions supporting employee records, workflows, leave, performance and HR administration.

Comprehensive Management Solutions

Integrated management platforms that centralize business processes, operational visibility and control.

BI Intelligence System

Business intelligence solutions with analytics, dashboards and reports that support informed decision-making.

Electronic Archiving

Secure electronic document archiving with structured storage, retrieval, classification and controlled access.

Payroll and Attendance System

Integrated payroll and attendance management supporting time tracking, calculations, records and reporting.

CUSTOM SOFTWARE DEVELOPMENT

When off-the-shelf software does not match the business, we build around the requirement.

Q Nova provides customizable software solutions based on specific business requirements. We work with clients to understand processes, users, data flows, approvals, integrations and reporting needs before shaping the solution.

01 Discover

Understand business objectives, users, workflows, pain points and success criteria.

02 Design

Translate requirements into solution architecture, user journeys, interfaces and functional scope.

03 Develop

Build and configure the solution with emphasis on maintainability, scalability and integration readiness.

04 Integrate

Connect required systems, services and data sources where integrations are part of the approved scope.

05 Test & Deploy

Validate functionality and user journeys, support acceptance activities and prepare deployment.

06 Support & Evolve

Provide ongoing support and enhancement options as business requirements develop.

SOLUTIONS FOR REAL BUSINESS NEEDS

Connecting business priorities with practical technology.

BUSINESS NEED	Q NOVA SOLUTION AREAS
Customer acquisition & engagement	Web apps, mobile apps, CRM, eKYC
Finance & business control	Accounting, cloud accounting, reporting-enabled solutions
Retail & branch operations	POS, inventory management, integrations
Asset & stock visibility	Inventory, asset management, RFID solutions
Unique operational workflows	Custom software development and tailored integrations

Flexible Delivery

Defined scope, phased implementation, solution customization or broader digital-transformation requirements.

Integration-Oriented

Solutions can be designed to work with existing business systems, APIs and operational platforms.

Built for Growth

Plan for future enhancement so features, workflows, users and integrations can expand over time.

CONNECTED BY DESIGN

Practical delivery principles for modern business systems.

Q Nova's delivery model is designed around business requirements, system connectivity and future change.

Where the approved scope requires it, solutions can connect with existing systems, services, data sources and APIs.

API & System Integration

Connect approved external systems, services and operational platforms rather than creating isolated technology.

Workflow Configuration

Shape user roles, approvals, data flows and business processes around the client's operating model.

Reporting Readiness

Structure solutions around operational visibility and reporting requirements identified during discovery.

Scalable Architecture

Design with maintainability, future enhancements, additional users and expanding integrations in mind.

Phased Implementation

Deliver through a defined scope or staged rollout depending on project requirements.

Ongoing Evolution

Support enhancement options as processes, users and business requirements develop.

HOW Q NOVA CAN HELP

Illustrative solution scenarios based on Q Nova's stated capabilities.

DIGITAL CUSTOMER ONBOARDING

Combine a customer-facing web or mobile journey with eKYC and CRM to streamline registration, verification and follow-up.

CONNECTED RETAIL OPERATIONS

Bring POS, inventory and reporting workflows together to improve branch visibility and operational control.

ASSET VISIBILITY

Use inventory, asset-management and RFID capabilities to support identification, movement tracking, assignments and operational records.

CUSTOM BUSINESS PLATFORM

Build a tailored platform around unique workflows, user roles, approvals, reporting needs and required integrations.

Note: These are capability-based examples and are not presented as named client case studies.

REGIONAL REACH

Qatar base. Regional collaboration.

Q Nova is registered in Qatar and extends its market reach through joint-venture and cooperation agreements with other companies. This collaborative model supports business development, project opportunities and delivery capabilities across selected regional markets.

QATAR

SAUDI ARABIA

UNITED ARAB EMIRATES

JORDAN

PALESTINE

The regional model is intended to combine local market access and business relationships with Q Nova's software and solution capabilities, enabling pursuit of opportunities across multiple industries and markets.

WHY Q NOVA

Business-first thinking with multiple capabilities under one technology portfolio.

Business-First Thinking

Start from the operational requirement and business objective, not from a fixed technology package.

One Partner, Multiple Capabilities

Web, mobile, eKYC, CRM, ERP, HR, BI, accounting, POS, inventory, RFID, archiving, payroll and custom software.

Customization

Tailor solutions to workflows, user roles, approvals, reporting requirements and integration needs.

Regional Reach

A Qatar-registered company with cooperation arrangements supporting opportunities across key regional markets.

Scalable Engagement

Support focused applications as well as broader multi-module and transformation initiatives.

Long-Term Value

Consider maintainability, future enhancements and evolving business requirements throughout delivery.

THE VALUE OF CHOOSING Q NOVA

Increase Efficiency

Systems designed specifically to improve workflow and significantly increase productivity.

Reduce Costs

Smart solutions that help reduce operational costs and improve return on investment.

Greater Control

Complete control over operations with detailed reports and advanced dashboards.

LET'S BUILD THE RIGHT SOLUTION FOR YOUR BUSINESS.

Whether you need a customer-facing application, a business management platform, a digital onboarding solution or fully customized software, Q Nova is ready to translate your requirements into a practical technology solution.
